the NEIGHBORHOODS NETWORK
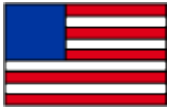

GOVERNANCE

WHAT tNN MUST DO

To GOVERN

**In order to enable the general population
to govern, tNN must:**

1. **Develop policy directives**, starting locally, then regionally and nation wide, telling the public servants what they should do and how.

2. **Learn** how government, at all levels, currently really operates.

3. Develop an approach for public servants to **modify** the various legislatures operational structures to genuinely serve the people, not political parties.

4. **Elect** public servants to do the Policy Mandates.
