THREATS to tNN tNN

**WHO and WHAT
CAN THREATEN?**

THREATS to tNN

tNN

IN GENERAL:

1. tNN is an **existential threat** to those who benefit from a non-democratic form of society.
2. Others, who simply **fear rule by the people**, will side with the elite who currently rule.
3. NUs can inadvertently do something that damages tNN.

THREATS to tNN tNN

**POSSIBLE SPECIFIC
ATTACKS or EVENTS**

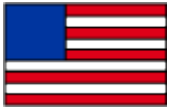

THREATS

tNN

Specific Attacks May Be:

1. to vilify tNN in the mass media.
2. to create **phantom NGUs**, devoid of real neighborhood members, consisting only of malicious web-sites, operated only to create malicious IDs and PDs to embarrass tNN and to create bad publicity and internal confusion.

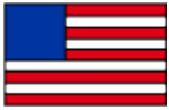

THREATS to tNN

tNN

Specific Attacks May Be:

3. to encourage NUs to segregate into political blocks adverse to one another – rather than to energetically pursue their potential common ground.
4. to pretend the NUs and tNN are some kind of radical plot instigated by foreigners.

PREVENTION

And

CORRECTION

THREATS to tNN

tNN

PROTECTION:

1. Our **best protection** will be to function openly, honestly, and produce good results.
2. Secondly, we must vigilantly test and maintain tNN's vital structures: the sets of NUs, Registries, Relays, and the NIN.
3. When sabotage is detected, it must be thoroughly investigated, and the situation communicated wide and far. Multiple NUs, working largely independently, must do this.
